

# THE PPDB

## Goods and Services

---

### Goods and Services:

1. The PPDB is available in Microsoft (MS) Access 2000 version as well as the online format. The MS Access version can be acquired for personal or site use subject to a licence agreement. Cost guidelines are provided below.
  2. The online format is somewhat restrictive regarding the search facilities, however we are pleased to offer a consultancy service to undertake any specific searches and provide you with a report. Please contact us with your requirements and we will provide a quotation.
  3. We can also offer bespoke interrogation software such that you can undertake your own database searches from your desktop. Our basic software can be purchased and/or we can adapt this to suit your specific needs. Prices for this are given below. Please note that a database licence is also required.
- 

### PRICE LIST for DATABASE LICENCES

#### Individual Purchasers

For individual purchasers, who will not be making commercial use of the database:

|   |         |
|---|---------|
| Price per data type (e.g. Vapour pressure mPa): | £55.00  |
| Price per data group (e.g. Fate):               | £275.00 |
| Price for full database:                        | £550.00 |

In each case the price does not normally include subsequent upgrades, although this can be arranged for a small fee dependent on individual requirements.

Please contact us for a quotation for multi-user sites.

#### Research Purchasers

For EU research projects, only an administration fee is payable, subject to data requirements and updating schedules; this is likely to be in the range of £100 to £500. However, it is advisable to discuss including us in the project consortium, so that we can then ensure that future database developments meet project needs, and instigate tailor-made management protocols.

For other research projects, the price is likely to be in the range of £250 to £5000, subject to data needs, updating and distribution.

Please contact us for a quotation for multi-user sites.

#### Commercial Purchasers

Commercial clients may obtain access to bespoke sub-sets of the PPDB; however, this is costed on an individual basis, dependent on the amount of data required, and the purpose to which it is to be put. For further information and/or and individual quote please contact the team.

## **PRICE LIST for OTHER SERVICES**

### **Bespoke searches and data reports:**

We can undertake special database searches on your behalf and provide a report. The types of searches that we can undertake include:

- 1) Lists of substances and the appropriate data that fall within defined parameter limits such as Koc and DT50.
- 2) Lists of substances and the appropriate data that exhibit a certain property(s) or impact(s) such as endocrine disrupters or those with high toxicity to bees or earthworms.

Bespoke searches are priced on an individual basis but generally tend to be in the region of £250 sterling. Please contact us for further details.

### **Bespoke interrogation software:**

We can provide desktop software that will allow you to search data and parameters at will. This package is user friendly and allows quite complex searches and reporting mechanisms. The cost of this package is £750 sterling and will also require a database licence (see above). We can also offer services to amend and customise this software to match your exact specifications. Please contact us for further details.
