

FOOTPRINT Advisory Committee

The FOOTPRINT Advisory Committee aims at:

- i) providing feedback on the work which is being carrying out in the project;
- ii) ensuring the relevance of the FOOTPRINT tools developed to the needs of the end-user communities.

The Advisory Committee has 2 levels of commitment. Level-1 members have a strong interest in the tools being developed and have a strong input in the project. The 'Level 2' commitment level is intended for those individuals who want to have a lighter contribution to the project, but still want to provide their opinion with regard to the project and its relevance to their work.

The advisory Committee meets once a year at the FOOTPRINT annual meetings.

Level 1 members of the Advisory Committee
