

OSCAR Software Update History

Date	Version	Description
28/02/2013	1.1.8	A number of bug fixes plus minor improvements, including a new facility (in the download tool) for manually downloading and installing updates (for those users who may not be able to use the automated service, e.g. due to proxy server issues on their network).
19/02/2013	1.1.7	A number of bug fixes plus minor improvements, plus incorporation of OSCAR Manual on Help menu.
19/12/2012	1.1.6	A number of bug fixes plus new video demonstrations available within the help system.
05/12/2012	1.1.5	A number of bug fixes to the MAC and Regional Breakdown charts, including fixing an error in the calculation of impacts per hectare.
30/11/2012	1.1.4	Minor bug fixes. New ability to sort selected operations by categories and measures
16/11/2012	1.1.3	Minor bug fix to version 1.1.2, adaptation impacts table in detailed report was not being displayed properly in some instances.
14/11/2012	1.1.2	New features including: Production impact assessment; Improved cost:benefit analysis/MAC curves; Data quality indicator; Reference sources displayed. RDP reports improved and general bug fixes.
09/10/2012	1.1.1	Minor bug fixes, and introduction of aggregated results by New RDP Measures.
27/09/2012	1.1.0	Incorporated proposed 'New RDP Measures' taxonomy and implemented a Training, Education and Advice (TEA) Factor to adjust the potential efficacy of RDP operations.
14/09/2012	1.0.9	A few minor bug fixes including prompting to recalculate when changing setting to include or exclude carbon sequestration from carbon balance. New oscar file structure so old files cannot be opened using this version.
11/09/2012	1.0.8	Carbon balance for RDP operation is now presented for 7 different time horizons (1 to 250 years). Required change to databases, so new databases will also need to be downloaded after installation. Also includes a few bug fixes and other minor improvements.
04/09/2012	1.0.7	A few bug fixes that arose from the new database structure introduced in version 1.0.6.
04/09/2012	1.0.6	Underlying OSCAR database split into separate databases for individual countries. This reduces the size the software installer and allows users to select which data they want. Note: one ore more databases will need to be downloaded before the software can be used.
30/08/2012	1.0.5	Revised calculation routines and presentation of adaptive capacity impact assessment results and improved regional breakdown data.
29/08/2012	1.0.4	Bug fix to core software. When selecting an RDP measure would sometimes get run-time error 380 (invalid property value). This has now been fixed.
29/08/2012	1.0.3	Bug fix to core software. When regional settings (locale) on a users PC was using a comma as a decimal point character, this sometimes caused run-time error 13 (type mis-match) when selecting an RDP operation. This has now been fixed.
